REMARKS:

Claims 1-15 are pending.

Amendment is made to correct minor informalities in the Abstract and to eliminate all multiple dependencies from the claims, thereby avoiding the need to pay the multiple dependent surcharge.

Respectfully submitted,

J. Georg Seka

MARKED-UP VERSION OF THE CHANGES TO THE ABSTRACT

[Abstract] Abstract Of The Disclosure

The magnetic stirring apparatus (1) comprises an agitator (1a), at least one permanent magnet (1d, 1e) and a float body (1f), which are connected to one another.

MARKED-UP VERSION OF THE CHANGES TO THE CLAIMS

3. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that it tapers into a tip (1c) in the region of the first end section (1o).

4. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that the agitator (1a) is formed symmetrically; and in that at least two permanent magnets (1d, 1e) are symmetrically arranged in the agitator (1a).

5. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that the float body (1f) has an increasing inner cross-section at least along one part section in the direction of the second end section (1p).

6. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that at least one vane (1h) is arranged at the bar (1b).

7. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that a permanent magnet (1m) is arranged in the float body (1f).

8. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that the float body (1f) is formed in an annular shape.

9. (amended) A magnetic stirring apparatus (1) in accordance with [one of the preceding claims] claim 1, characterised in that the agitator (1a) is made in a bar shape, a star shape or a circular shape.

14. (amended) An agitating device (6) in accordance with [one of the claims 10 to 13] claim 10, characterised in that the magnetic stirring apparatus (1) has a toe bearing.

15. (amended) A bio-reactor comprising a magnetic stirring apparatus (1) in accordance with [one of the claims 1 to 9] claim 1 and[/or comprising] an agitating device [(6) in accordance with one of the claims 10 to 14].
